SUBJECT: BLUE LANTERN LEVEL 3: PRE-LICENSE END-USE CHECK ON
APPLICATION 050067028

REF: SECSTATE149564

¶1. Summary: The Indonesian firm PT Anjelika Surya Jaya (Anjelika) verified on December 13 its order of automati direction finder (ADF) receiver for F-27 aircraft detailed in reftel. An Indonesian Air Force (AF) officer confirmed on December 13 that Anjelika is a registered supplier on the IAF's supply list and the IAF placed the order. We visited Anjelika's office facility on December 18, 2007 and concluded that while the company appears to be legitimate, it is a small, unsophisticated operation with minimal on-site security. End summary.

¶2. We contacted Anjelika Surya Jaya on December 13 to confirm transaction of goods listed in reftel. Anjelika's marketing executive Christian Deni confirmed that the company received an order from the IAF in September 2007 to procure spare parts for IAF's F-27 aircraft. On December 18, we met with Anjelika's President Director Sardjono (retired IAF general) and Director Sukirwan (retired IAF colonel) at their office. The third partner in the company, Rio Permana, was not able to attend. They provided copies of the contract with IAF for procurement of avionics components as well as purchase order and end user/end use statement for the ADF receiver detailed in reftel.

¶3. According to Deni, the ADF receiver will be shipped by air from the U.S. seller through Horizon International, a freight forwarder used by the company, in Singapore. Sardjono and Sukirwan said using a shipping company in Singapore was cost-effective. Horizon will then deliver the component to Anjelika before sending to IAF's warehouse at Halim Air Force Base in East Jakarta. Anjelika's relationship with Horizon is only five to six months old. Sardjono and Sukirwan said the IAF typically chooses the shipping company. Sardjono said a retired Navy friend, Maximilian Pong, recommended Horizon to him.

¶4. Sardjono and Sukirwan said they will hold the components in an unused space at Anjelika's office until delivery, which they said would be the same day or next business day. We observed the holding space and noted that it is a small office with one barred window. They said their office boy sleeps at the office so that the office is never left unattended. There are no other on-site security measures. However, the office is located in an area that is governed and patrolled by the IAF as it contains the former IAF Headquarters and still contains IAF officer housing. The IAF has guards posted at the access points to this area around the clock; however, they only restrict entry at night.

¶5. Deni said that his company contracted to procure avionics components without installation services. Deni said that the company is well aware of the restrictions of United States Munitions

List (USML) articles, including those pertaining to unauthorized re-transfer and re-exports. However, Sardjono and Sukirwan did not know about the restrictions and they were surprised that the ADF receiver was included on the USML because ADF receivers are used in commercial airplanes and are not sensitive military equipment, according to them.

¶6. PT Anjelika Surya Jaya was established in 2005 to supply aircraft spare parts as well as ground radar and communications parts. To date, the company supplies avionic components solely for the IAF. Anjelika has regular procurement contracts with IAF to supply spare parts for their Puma, Bell and Colibri helicopters. Their accountant holds a Bachelor's degree in economics.

¶7. We contacted Lieutenant Colonel M. Gofar, IAF Section Chief of Procurement Services for Radar and Avionics on December 13 to confirm the transaction on application 050067028. Lt. Col. Gofar confirmed that Anjelika Surya Jaya is their registered supplier. Gofar confirmed that his office ordered components detailed in reftel from Anjelika in September 2007. According to Gofar, this is the first transaction with the company in 2007, but IAF plans to place other orders in 2008. Lieutenant Colonel M. Gofar also confirmed that an Indonesian Armed Force Squadron technician will install the ADF receiver into their F-27 aircraft.
